DETAILED ACTION

Allowable Subject Matter

1. **Claims 1-24 are allowed.**
2. The following is an examiner's statement of reasons for allowance: As to claims 1, 11, and 23, the prior art of record does not teach nor render obvious the overall claimed combination of **(1) a method of determining an adjusted traction force comprising the steps of determining compensating forces related to a weight of the first body supporting portion, a weight of an applicable portion of a patient's body, and an angle between the first body supporting portion and horizontal and applying the compensating force to a desired traction force to determine the adjusted traction force; (2) a therapeutic apparatus comprising a processor programmed to receive the weight of the portion of the patient's body supported by the first body supporting portion and an angle between the first body supporting portion and horizontal, the processor being programmed to determine an adjusted traction force; (3) an input device adapted to enter into a processor the portion of the patient's body supported by the first body supporting portion, where the processor programmed to determine an adjusted traction force. Therefore, the invention defined in claim *** is novel.**
3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record on form PTO-892 and not relied upon: US 6,152,950 discloses a traction apparatus with an angle determining means indicating the angle to the axis through which a pulling
